

Vitendo delivers industry's first UMA Softphone.

Vitendo's UMA Softphone will help Accelerating Worldwide Deployment of FMC Technology and enable Mobile Operators to capture new revenue.

NEWPORT BEACH, California, Jan 3, 2008 -- Vitendo Systems, Inc., a leader in products and technology for Fixed-Mobile Convergence ("FMC"), today announced that it has released vFone 4.0, the industry's first UMA-based Softphone for PC applications. Unlicensed Mobile Access ("UMA") is a key component of the FMC strategy for cellular operators worldwide. UMA allows mobile operators to offer their services over the Internet using the broadband and WiFi infrastructure already available in hundreds of millions of households worldwide.

"In the battle for capturing the indoor traffic, we believe that FMC-enabled cellular operators are in a perfect position to capture an increased share of the customers total monthly spend and start generating new revenue based on convergence" said Bernard Debbasch, Vitendo's President and CEO. He further added, "the UMA Softphone is a perfect platform to accelerate any FMC deployment and allow cellular operators to compete with peer-to-peer offerings that will stay *"unconverged"* for the foreseeable future".

vFone 4.0 offers the familiar look and features of a cellphone, allowing end users to make-and-receive calls and send-and-receive SMS from their laptops/desktops, while maintaining a unique identity on the network.

vFone 4.0 feature set includes:

- Standard's compliant, comprehensive suite of GSM and IPSec protocols
- Worldwide interoperability with existing UMA deployments
- Patent-pending zero install architecture allows on-the-go deployments on USB flash drives and SIM card holders
- High-quality voice engine provides toll grade voice quality
- Skinable user interface allows OEM's to customize the look and feel of vFone to match their branding needs.

Availability

vFone 4.0 is available immediately on Windows 2000, Windows XP and Windows Vista. For a detailed feature set and licensing enquiries, please contact Vitendo.
